

**MD SAHADAT HOSSEN**

Address: 405/1, Shaheen Bag, Tejgaon, Dhaka

Contact: 01757608834

Email: sahadathossen3@gmail.com

Career Objective:

To secure a position as a Senior Software Engineer in a fast-paced, innovative software company where I can apply my technical expertise, communication skills, problem-solving abilities, and extensive experience to drive organizational growth and success.

Career Summary:

With **over 7 years of comprehensive experience** in software engineering, I am currently employed at Placovu Inc. as a Senior Software Engineer. My expertise lies in the .NET Framework, with a strong focus on ASP.NET MVC, .NET Core, C#, jQuery, Entity Framework, and MS SQL. Throughout my career, I have successfully led and contributed to numerous projects involving warehouse automation, attendance and HRM systems, sales and workflow optimization, Management Information Systems (MIS), and Enterprise Resource Planning (ERP) solutions.

SKILLS**Back Ends:**

1. C#, .NET (Core, MVC, Windows Forms, Windows Services)
2. API development
3. SOLID Principles (Open-Close, Single Responsibility, Interface Segregation)
4. Patterns: Repository, Unit of Work

Front Ends:

5. HTML, CSS, JavaScript (jQuery, Ajax, JSON)
6. Bootstrap, Razor, Blazor

Machine Learning:

7. AT-Commands, WebSocket, Serial Communication (RS-232C, RS-422A/485)
8. Device Integration (ZKTECO, SUPREMA, RFID, QR Scanners, Thermal Printers, OCR, GSM Modems)

IOT:

9. Arduino, Circuit Design
10. Sensors (Weather, PIR Motion, Temperature, Light, Ultrasonic, GPS, etc.)

Collaboration:

11. Git, GitHub
12. Slack, JIRA
13. Jenkins, Client/Requirement Meetings

Server & Storage:

14. AWS, Azure
15. MS SQL Server, Oracle
16. Entity Framework, LINQ, Lambda
17. IIS, Docker

Authentication:

1. Identity Server, Single Sign-On (OpenID, OAuth)
2. JWT, Claims, Cookies
3. Form/Windows Authentication

Educational Qualification

Bachelor of Science (Hons) in CSE

Duration: 4 Years/8 Semesters

Duration: 4 Years/12 Semesters

Credit: 150

Credit: 160

CPGA: 3.32 out of 4.00

CPGA: 3.18 out of 4.00

Graduation Year: 2016

Graduation Year: 2023

Institute: Bangladesh Sweden Polytechnic
Institute, Kaptai

Institute: Canadian University of Bangladesh.

Diploma in Engineering in CSE

Working Experience

a. PlacoVU Inc.

Address: Baridhara DOHS, Dhaka

Position: **Sr. Software Engineer**

Duration: 01-May-2024 to continue

b. Encoders InfoTech Ltd

Address: Mohakhali DOHS, Dhaka

Position: **Software Engineer**

Duration: 01-Dec-2017 to 30-Apr-2024

c. Service One Ltd

Address: Green Road, Dhaka

Position: **Programmer**

Duration: 01-Jan-2017 to 30-Nov-2017

Projects

1. AGM

This project is an Annual General Meeting (AGM) solution designed for companies, featuring live telecast capabilities, interactive features such as chat and comments, voice messaging, and a QR code entry pass system. Additionally, it includes an Internet of Things (IoT) entry gate system powered by Arduino for seamless entry management.

Key Features:

- Live Telecast:
- Interactive Features
- Voice Messaging
- QR Code Entry Pass System
- IoT Entry Gate System with Arduino
- Security and Access Control
- Real-time Attendance Tracking
- User Authentication and Authorization
- Agenda Management
- Voting Interface
- Real-time Voting
- Integration with Meeting Platforms

2. Business Express

This project is a comprehensive solution developed for business depot and distributor sales, focusing on stock management, invoicing, VAT (Value Added Tax) calculation, Challan generation, and truck load management. It is built using ASP.NET Web Forms, Oracle database, and Crystal Reports for reporting.

Key Features:

- Business Depot and Distributor Sales
- Stock Management:
- Invoice Generation
- VAT Calculation: Challan Generation
- Truck Load Management
- ASP.NET Web Forms

For more details_ [Documentation](#)

3. **Circadian**

This project is an overall dynamic workflow solution designed to streamline various approval processes within an organization. It includes workflows for processes such as asset requisition, bill approval, foreign travel requisition, import requisition, letter of credit (LC), purchase requisition, project monitoring, spare requisition, and more. The solution is built using ASP.NET MVC, Microsoft SQL Server, and Entity Framework.

Key Features:

- Dynamic Workflow Management
- Asset Requisition
- Bill Approval
- Foreign Travel Requisition
- Import Requisition:
- Letter of Credit (LC)
- Purchase Requisition
- Project Monitoring
- Spare Requisition

For more details_ [Documentation](#)

4. **Chemical Lab**

The Chemical Lab Automation System is a comprehensive solution developed using ASP.NET Blazor and SQL Server, designed to automate laboratory processes and data management for chemical analysis. The system integrates with various laboratory instruments such as QTM (Quality Testing Machine), Gas Chromatographer, Blend Analysis, PPM analyzer, Smoking analyzer, Densimeter, and more, allowing real-time data capture and analysis.

Key Features:

- ASP.NET Blazor
- Real-time Data Capture
- Instrument Integration
- Data Analysis and Reporting
- Quality Testing
- Gas Chromatography Analysis
- Blend Analysis
- PPM Analysis
- Smoking Analysis
- Densimeter Integration

5. **ESDP-BO**

The Back Office Management project for Entrepreneurship Skill Development Program (ESDP) in Bangladesh is a comprehensive solution developed using .NET MVC and Microsoft SQL Server. This project aims to streamline the management of training programs and loans for entrepreneurs participating in the ESDP initiative, empowering them with the necessary skills and financial support to succeed in their ventures.

Key Features:

- Training Program Management
- Loan Application and Approval
- Loan Disbursement and Tracking
- Financial Management and Reporting
- Participant Database and Profile Management
- Communication and Collaboration Tools
- Document Management and Compliance

6. **IQMS**

The Integrated Quality Management System (IQMS) is a comprehensive solution developed for British American Tobacco Bangladesh (BATB) to manage quality control processes for cigarette manufacturing. The system is designed to connect with over 10 Cigarette Quality Control (QC) testers, facilitating real-time data capture from these devices and generating reports. It is built using Microsoft Windows Forms for the user interface and Oracle database for data storage and management.

Key Features:

- Microsoft Windows Forms
- Oracle Database
- Integration with QC Testers
- Real-time Data Capture
- Device Configuration Management:
- Quality Control Analysis
- Report Generation
- Integration with Manufacturing Systems
- Training and Support

7. **Kaizoe**

This project is an overall dynamic workflow solution designed to streamline various approval processes within an organization. It includes workflows for processes such as asset requisition, bill approval, foreign travel requisition, import requisition, letter of credit (LC), purchase requisition, project monitoring, spare requisition, and more. The solution is built using ASP.NET MVC, Microsoft SQL Server, and Entity Framework.

Key Features:

- Dynamic Workflow Management
- Asset Requisition
- Bill Approval:
- Foreign Travel Requisition
- Import Requisition
- Letter of Credit (LC)
- Purchase Requisition
- Project Monitoring
- Spare Requisition

8. **Magneto**

The Visual Quality Inspection project for British American Tobacco Bangladesh (BATB) Savar Factory is an innovative solution leveraging Internet of Things (IoT) technology, Arduino microcontrollers, .NET Core Blazor for the user interface, and Microsoft SQL Server for data storage. This project aims to automate and enhance the quality inspection process for cigarette manufacturing, ensuring adherence to stringent quality standards.

Key Features:

- Arduino-based Sensor Integration
- .NET Core Blazor User Interface
- Real-time Data Streaming and Analysis
- Quality Control Dashboard
- Alerts and Notifications:
- Historical Data Storage and Reporting
- Remote Monitoring and Control
- Integration with Manufacturing Systems

For more details_ [Documentation](#)

9. **Nova-Carta**

The LC (Letter of Credit) Automation project for British American Tobacco Bangladesh (BATB) is a comprehensive solution developed using .NET Core Razor for the user interface and Microsoft

SQL Server for data storage. This system automates the entire process of managing letters of credit, from requisition to product receipt, streamlining operations and enhancing efficiency.

Key Features:

- Requisition Management
- LC Application Processing
- LC Tracking and Monitoring
- Document Management
- LC Amendment Handling
- Product Shipment and Receipt
- LC Compliance and Reporting

10. OQR

The Online Quality Reporting Tool & Call Center Complaint Sanitization and Validation process is a web-based application developed using ASP.NET MVC and Oracle Entity Framework (EF) for BATB QAD (British American Tobacco Bangladesh Quality Assurance Department). This tool aims to streamline the quality reporting process and enhance customer service by efficiently managing complaints received through the call center, ensuring their proper validation and resolution.

Key Features:

- Quality Reporting Tool
- Call Center Complaint Management
- Sanitization and Validation Workflow
- Dashboard and Analytics

11. RGL Customer Portal

The Customer Login and Order Processing System for Rahimafrooz Globatt Limited Bangladesh is a web-based application developed using ASP.NET MVC and SQL Server Entity Framework (EF). This system facilitates seamless interaction between customers and the company's sales and support departments, enabling efficient order processing, updates, and reporting.

Key Features:

- Customer Authentication and Account Management
- Order Placement and Tracking
- Order Processing Workflow
- Order Update Notifications
- Customer Support and Assistance
- Reporting and Analytics
- Integration with Backend System

12. SMS

The Share Management project for British American Tobacco Bangladesh (BATB) is a comprehensive solution developed using .NET Core Razor for the user interface and Microsoft SQL Server with Entity Framework for data storage and management. This system efficiently handles all aspects related to company shares, including dividend management, buyouts (BO), bonus shares, and shareholder information.

Key Features:

- Shareholder Information Management
- Dividend Management
- BO Holder Management
- Bonus Share Management
- Share Transfer
- Transaction Tracking
- Reporting and Analysis
- User Authentication and Authorization
- User-Friendly Interface

For more details_ [Documentation](#)

13. **SBL Canteen Automation**

The IoT Canteen Kiosk System for Siemens Bangladesh Limited leverages ZKTeco Machine SDK, .NET MVC, and SQL Server EF to provide an innovative solution for canteen management. This system enhances efficiency and convenience by automating the canteen ordering process through IoT-enabled kiosks.

Key Features:

- ZKTeco Machine SDK Integration
- Canteen Menu Management:
- Order Placement
- User Authentication and Access Control
- Order Processing and Fulfillment
- Transaction Logging and Reporting
- Real-time Monitoring and Alerts

14. **SCHM (Swiss Color Huntsman)**

The SwissColours-Huntsman portal is product Loan, Sales, and Inventory Management System for [SwissColours Bangladesh Ltd](#) is a comprehensive web-based application developed using ASP.NET MVC and MS SQL Server Entity Framework (EF). This system facilitates efficient management of product loans, sales, and inventory for SwissColours Bangladesh Ltd, enabling streamlined operations and enhanced customer service.

Key Features:

- Product Catalog Management:
- Loan Management
- Sales Order Processing:
- Inventory Tracking and Control:
- Customer Relationship Management (CRM):

Overall, the Product Loan, Sales, and Inventory Management System empower SwissColours Bangladesh Ltd to optimize its operations, streamline processes, and deliver exceptional service to customers while maintaining control over inventory and financial resources.

15. **Textile ERP**

The ERP (Enterprise Resource Planning) system developed for [GMA Bangladesh](#), a garment manufacturing company, is a comprehensive solution built using .NET Core MVC, Microsoft SQL Server, and Entity Framework (EF). It aims to streamline and integrate various business processes across departments within the organization.

Key Features:

- .NET Core MVC
- Microsoft SQL Server
- Entity Framework (EF)
- Modules Integration
- Inventory Management
- Production Planning and Scheduling
- Order Management
- Supply Chain Management
- Financial Management
- Human Resource Management
- Sales and Marketing
- Customizable Dashboard
- Training and Support

Overall, the ERP system for GMA Bangladesh serves as a centralized platform to streamline operations, improve collaboration, and drive business growth by leveraging modern technologies and best practices in garment manufacturing management.

For more details_ [Documentation](#)

16. **Vector**

The Tax Stamp Management Software is a comprehensive solution developed for managing the entire process of tax stamp control, from receiving stamps from SPCBL (Security Printing Corporation Bangladesh Limited) to distribution to operators, quality control, fault management, wastage tracking, and returns to SPCBL. The software is tailored specifically for British American Tobacco Bangladesh (BATB) to streamline and automate tax stamp management operations by Asp.net MVC, EF Oracle etc.

Key Features:

- Receive from SPCBL
- Storage Management
- Distribution to Operators
- Quality Control
- Fault Management:
- Wastage Tracking
- Return to SPCBL

Overall, the Tax Stamp Management Software offers BATB a robust and efficient solution for managing tax stamp operations, ensuring compliance with regulatory requirements, optimizing inventory management, and enhancing operational efficiency throughout the supply chain.

17. NSR

The Nation Stroke Register System is a specialized web-based application developed using .NET MVC and MS SQL Server to facilitate the comprehensive management of stroke patient data, diagnosis, and treatment information. This system serves as a centralized registry for capturing, storing, and analyzing data related to stroke cases, enabling healthcare professionals to better understand and address stroke-related issues.

Key Features:

- Patient Registration and Data Entry
- Diagnosis and Assessment Tracking
- Treatment Planning and Management
- Outcome Monitoring and Follow-Up
- Data Analysis and Reporting
